The document may be reprinted for the purpose of education and promotion of the Natural Gas industry so long as the document is presented in whole.

A Message from UNION OIL & GAS and TEAVEE OIL & GAS

How Can You Tell Where Gas Lines Are Located?

- Line markers (yellow or yellow with a blue top) are used to indicate the approximate location of underground gas lines.
- The markers are required to display the following information:
 - The material contained in the line.
 - The gas company's name.
 - A phone number where company officials can be reached in the event of an emergency.
- Pipeline markers are important to public safety. It is a federal crime to willfully deface, damage, remove or destroy any pipeline sign or marker required by federal law.
